EXPERIENCE

Gardner Software Consulting

Software Consultant   Jan 2025 - Present

- Provide technical advice and code expertise to teams looking for an outside perspective.

Upstatement

Lead Engineer   Jan 2024 - Aug 2024

- As a tenured engineer, mentored and advised others in the project development lifecycle phases by applying and sharing company and industry methodologies and standards.
- Participated in the estimation of client project scopes and timelines during planning phases.

Senior Engineer   Mar 2018 - Dec 2023

- Led project technical strategy and build phase for clients that include Ivy League universities such as MIT and Cornell, independent media organizations such as Grist and Compiler, and progressive nonprofits such as Everytown for Gun Safety and Carbon180.
- Updated and maintained in-house resources to reduce boilerplate coding for new project builds.

Engineer   Oct 2015 - Feb 2018

- Worked with designers, project managers, and clients to analyze project requirements to design, develop, and implement contract deliverables.
- Independently built out in-house invoicing tool to increase productivity for account managers.

Apprentice   May 2015 - Sept 2015

- Assisted in building out web experiences via both front-end and back-end development code for various clients.
- Documented, triaged, and resolved bugs in software and design.
